Effective: 1 November 2006

PRODUCE: APPLE

ТҮРЕ	Green	VARIETY	Mutsu
CLASS	One	NOTES	

Light to mid green skin. Creamy to white flesh. Normal bloom, lenticets to be brown not black or prominent. Stem intact. Stems may be missing provided the break is clean and there is no torn flesh or skin. No foreign matter. Generic industry fruit sticker showing PLL number or bar code and produce variety (Supplier branded stickers preferred.) Stickers to cover a minimum % of fruit intended to be sold loose, except pre pack fruit. Sensory Skin smooth to dry, crisp firm mildy tangy taste; no objectionable odours or tastes. Shape Square, oblong shape. Slightly ribbed and crowned at apex. No irregular curvatures or distorted shapes. Size Evenly sized fruit (as pre-ordered per requirements). Apples supplied in 1.5 kg pre-packs to be 64 - 67 mm di Maturity Harvested ripe, minimum penetrometer value (11mm plunger): 6.8 - 7.0 kg. Brix > 11.0° (Soluble Solids) at rec MAJOR DEFECTS Insects With evidence of live insects. With fungal or bacterial rots of the skin or flesh (eg Anthracnose, blue mould, grey mould). With sunken spots surrounded by red/ black halo (Apple scab). Physical/Pest Damage With cuts, holes, cracks or wounds (that break the skin). Stem punctures should not exceed 3 pieces per carl With deep, soft bruises that have distinct edges and are indented or watersoaked lesions With brown discolouration of the skin (superficial scald). With brown discolouration of the skin (superficial scald). With stranslucent core flesh (watercore); with brown core or internal cavities (brown heart) With skin discolouration (sunburn). With skin discolouration (sunburn). With skin discolouration (sunburn). With healed injuries in skin (eg hall marks, limb rub), affecting in aggregate > 1 sq cm. With scattered cheek russet affecting > 6 sq cm. With scattered cheek russet affecting > 6 sq cm. With dropped shoulders > 15° angle from the calyx.
